Tekla North America BIM Awards 2015 See the winners!

We are proud to announce the winners of the 2015 North America BIM Awards! First, we would like to thank everyone that entered the competition and everyone that voted. Once again this year, the entries were outstanding and showed complex modeling and extensive collaboration by taking advantage of BIM and Tekla Structures.

After a public vote followed by a judging panel of industry experts, the following projects are announced as the winners of the 2015 North America BIM Awards:

The *Commercial* category award goes to the [PNC Tower](#) model located in Pittsburgh. BuroHappold Engineering, PNC Bank, Gensler, PJ Dick Inc., Sippel Steel Fab, Steel Structures Detailing Inc., Axis Steel Detailing, Inc., and International Design Services, Inc. collaborated on this project.

Prodraft, Inc. was the recipient of the *Public* category award for their model of [The Smithsonian National Museum of African American History and Culture](#) located in Washington DC.

The *Industrial* category award goes to Ruby and Associates for their model of [Absorber Ductwork Exoskeleton](#) located in Colorado.

D.S. Brown won the *Infrastructure* category award for their model of the [Bridge Finger Expansion Joints at Pier 7](#) located in Iowa.

Finally, the *Small* category award goes to Apex Structural Design for their model of [Mutant Trees](#) located in Canada.

In addition to the winners, take a look at all of the remarkable entries [here](#). Each project offered some unique attributes that we will continue to feature in marketing material throughout the year. Lastly, look for these winners in the Tekla Global BIM Awards coming later this Fall and be sure to vote for your favorite!

Kindest Regards, the Tekla North America team
